russelldudek.github.io/spaceforce

Mission profile: Operator-technologist who turns fragmented operational, geospatial, technical, customer, and machine signals into visible priorities, governed workflows, and decision-ready action. Brings high-tempo execution, geospatial judgment, defense-linked technical rigor, and human-governed AI to the information environment mission.

ROLE-ALIGNED CAPABILITIES

Sense and prioritize	AI with human authority	Operate under tempo
Change detection, signal integration, operational dashboards, escalation paths, root-cause analysis, regulated field intelligence.	LLM workflows, RAG patterns, structured context, human review, evaluation, governance, manual override, decision records.	24/7 operating environments, shift cadence, rapid response, standard work, cross-functional coordination, accountable follow-through.

EXPERIENCE

Vape-Jet - Director of Operations2025-Present

- Leads AI-first operating transformation across production, purchasing, quality, customer success, support, engineering issue flow, ERP/Odoo, Jira, HubSpot, Slack, telemetry, and AI-assisted workflows.
- Connects factory, field, customer, and machine-fleet signals into prioritized work, earlier risk detection, cleaner handoffs, dashboards, standard work, training, and accountability.
- Works in a software-enabled robotics and machine-vision environment with approximately 1,000 fielded robots informing support and operating feedback loops.

DudeWorth - Founder / AI and Automation Advisor2017-Present

- Develops AI-readiness and opportunity frameworks assessing value, feasibility, data readiness, governance, adoption burden, reuse, and time-to-value.
- Designs agentic workflow patterns using structured context, retrieval, AI agents, human judgment, escalation, evaluation, and governance rails.
- Advises on AI-enabled operations, logistics technology, warehouse automation, AMRs, ASRS, cobots, transportation systems, network analysis, and workflow design.

Amazon - Operations Management / Site Leader2014-2018

- Led launch and execution for Amazon Prime Pittsburgh in a 24/7 customer-backward environment supporting approximately five million second-day orders annually.
- Built labor planning, throughput visibility, escalation paths, standard work, and operating mechanisms across safety, quality, throughput, and customer experience.
- Contributed to logistics innovation through Prime Air research and Amazon Flex geolocation concepts.

Compunetics - Director of Operations and Engineering Management2000-2013

- Led engineering, manufacturing, quality, customer delivery, and complex technical programs in advanced electronics and high-reliability environments.
- Built quality systems, standard work, root-cause practices, performance measures, and process controls.
- Collaborated with high-consequence customers and partners including DoD, CERN, Intel, and AMD.

ADDITIONAL EXPERIENCE

- Cardinal Building Products - Regional Director

2021-2023

- Built the company's first remote regional operation and modernized distributed CRM, commercial, fulfillment, logistics, digital marketing, and online-buying workflows.
- ZeusVu - Chief Pilot, Autonomous Systems and Aerial Data Operations

2018-2022

- Led regulated drone operations across medical, energy, logistics, real-estate, and restricted-airspace contexts with a 100% safety record and no FAA incidents.
 - Developed TensorFlow-based concepts for automated aerial inventory and computer-vision-enabled field intelligence.
 - Designed medical drone delivery and chain-of-custody concepts connecting technology, risk, stakeholders, and governed execution.
- Enviro Social Capital - Chairman of the Board

2014-2017

- Co-founded and led a public-private impact initiative focused on sustainable infrastructure, green finance, and civic transformation.
- IEEE - CMPT and EDS Pittsburgh Chapter Chair

2012-2016

- Led regional technology programming connecting industry, academia, STEM outreach, electronics, manufacturing, and emerging technology.

MISSION CONTRIBUTION MAP

Near-real-time monitoring and cueing	Live operating cadence, escalation paths, telemetry, and cross-system signal integration.	Ready-now operating capability
Geospatial and regional context	Regulated UAS, mapping, restricted-airspace, and aerial-data operations.	Strong mission transfer
LLM-assisted reporting with override	Agentic workflows, retrieval, evaluation, human judgment, and governance rails.	Ready-now workflow capability
Formal PAI/OSINT product conventions	Open research, source-grounded AI, network-analysis concepts, and high-consequence reporting disciplines.	Focused tradecraft ramp

EDUCATION AND CREDENTIALS University of Pittsburgh - Bachelor of Science; academic grounding includes materials science, physical chemistry, and biology-related studies. Credentials: Google AI Essentials IBM Enterprise Design Thinking Practitioner Six Sigma Certification OSHA 10	TECHNICAL TOOLKIT Agentic AI LLM workflows RAG patterns Human-in-the-loop design Python SQL JavaScript TensorFlow Tableau ERP/Odoo workflows Jira Confluence HubSpot Slack GIS and mapping workflows
---	--

Mission value proposition: Russell combines operational tempo, geospatial field intelligence, defense-linked technical work, signal-to-action mechanisms, and disciplined human authority over AI-assisted workflows. The focused ramp is formal IE/OSINT product convention and regional source architecture.
